

PacificaOTC White Paper

Overview

PacificaOTC is a secure and transparent Over-The-Counter (OTC) escrow platform for buying and selling **Pacifica Points**. Our goal is to provide a trusted space where community members, traders, and builders can engage in OTC trading with confidence.

Unlike informal peer-to-peer deals, PacificaOTC ensures every transaction is protected by **multisig escrow security**, transparent rules, and community oversight. By combining trustless infrastructure with human accountability, we aim to make OTC trading safe, efficient, and accessible for all Pacifica users.

Why PacificaOTC?

Safety First - Multisig Escrow Security

PacificaOTC uses a **multi-signature wallet system** managed by respected community figures. This guarantees that no single party can ever move funds independently. Instead, multiple signers must approve transactions, ensuring checks and balances.

PacificaOTC multisig signers include:

- Pacifica Core contributors
- Trusted ecosystem partners
- Independent community representatives

This structure protects buyers and sellers alike, making fraud nearly impossible while keeping escrow control decentralized.

Fair & Transparent Rules

- 2% of collateral from the buyer

- **2% of collateral from the seller**

For example:

If you trade \$5,000 worth of Pacifica Points, the fee would be **\$100** for each side.

Fee rules:

- Fees are applied when placing a bid, ask, or filling an order.
- Fees are **non-refundable** once a bid/ask is filled.
- Cancelling an unfilled order requires a **24-hour cooldown** before placing another.
- You may **increase a bid** or **decrease an ask** at any time.
- You may not **lower a bid** or **raise an ask** once it's posted.

These rules keep the marketplace fair and protect participants from manipulation.

How It Works

Step 1: Initiate Trade

Reach out through our official **Telegram group** and provide trade details in the format:

**Selling/Buying: XXXX | Type: Points/Tokens | Name: Pacifica Points |
Size: Quantity + \$ per point**

Step 2: Deposit Collateral

Both buyer and seller deposit **100% collateral** into the multisig escrow wallet. This guarantees that both sides are fully committed.

Step 3: Verification

Our escrow managers verify the collateral and confirm terms with both parties before execution.

Step 4: Secure Settlement

Shortly after TGE, funds are released securely. If the seller fails to deliver, the buyer is protected and will receive both parties' collateral as compensation

Failure to deliver:

If a seller fails to send points after settlement is due, the buyer will be compensated with **both parties' collateral**.

This system ensures zero tolerance for bad actors.

Our Mission

PacificaOTC is built with one clear mission: **to strengthen the Pacifica ecosystem by creating a safe, transparent, and community-driven OTC trading platform.**

We aim to:

- Protect traders from scams and impersonators
 - Provide a clear framework for OTC deals
 - Encourage more people to join the Pacifica community
 - Build a space where education, trading, and collaboration thrive

Disclaimers

Impersonation Warning

PacificaOTC is **not responsible** for losses caused by interacting with impersonators. Always verify that you are speaking to the **official administrator** listed above. Our co-signers will never DM you for deals unless explicitly confirmed by the admin.

Token Transfer Disclaimer

We are not responsible for funds lost due to:

- Sending tokens across **unsupported networks**
 - Sending tokens to the **wrong address**
PacificaOTC only accepts collateral and fees in **USDC on the Arbitrum network**.
-

Future Roadmap

PacificaOTC will grow beyond simple OTC escrow. Planned improvements include:

- **On-chain reputation system** for traders
- **Dashboard interface** for bids/asks
- **Automated dispute resolution** with voting by co-signers
- **Community incentives** for verified traders
- **Integration with Pacifica ecosystem dApps**

By combining transparency, accountability, and community trust, PacificaOTC aims to become the **gold standard for OTC trading** in the Pacifica ecosystem.

Closing Statement

The Pacifica ecosystem needs a safe, fair, and transparent OTC platform — and PacificaOTC delivers exactly that. By combining **decentralized escrow, clear rules, and community oversight**, we remove the risks of OTC trading and replace them with trust and accountability.

We welcome all Pacifica users — builders, traders, and future partners — to join us in shaping this ecosystem together.

This white paper is a living document and may be updated or improved in the future as PacificaOTC evolves.

Together, we can grow Pacifica.
